I'm an IT student passionate about front-end development, especially JavaScript, and UI/UX. I've built multiple responsive projects using React, Redux, and Tailwind CSS. I'm confident in both coding and communication, with strong English skills and a goal of becoming a professional developer who creates high-impact web experiences.

Education

information technology at SU, Arish , Egypt

September 2023 - Present

Projects

E-commerce • [↗](#)

The application offers a seamless shopping experience for users and a comprehensive management system for administrators. Users can browse product collections, view individual products, manage their shopping cart, and access their personal profiles. The admin dashboard allows for easy management of products (adding, editing, deleting), user administration, and provides an overview of the store's activities.

A modern, animated developer portfolio built with React, Tailwind CSS, Framer Motion, and Material Tailwind. Includes a fully working contact form using Formspree, smooth scroll-based animations, and responsive design.
