Profile

Full-Stack Developer and Information Technology student. Proficient in React, Node.js, and MongoDB, with a strong focus on clean architecture, performance, and user experience.

Experience

Full-Stack Developer Self-Initiated & Client Projects Aug 2024 – Present

- Delivered a client-facing product (Tivaq) with a custom admin dashboard, rich UI, and a product authenticity verification system.
- Collaborated with a teammate on Moviq, a large-scale movie and series platform, gaining practical experience in async workflows and code review.
- Implemented JWT authentication, bcrypt password hashing, and role-based access control across multiple projects.

Projects

Tivaq — React, Node.js, Express, MongoDB, Tailwind CSS, i18n [GitHub ↗](#) [Live ↗](#)

- Built a client-facing fragrance e-commerce platform featuring a rich, polished UI and smooth product browsing experience.
- Developed a comprehensive admin dashboard for inventory, order, and user management.
- Implemented a custom product authenticity verification system, allowing customers to confirm the origin of their purchases via a unique code flow.

Moviq — React, Node.js, TMDB API, Tailwind CSS [GitHub ↗](#) [Live ↗](#)

- Co-developed a full-featured movie and TV series discovery platform powered by the TMDB API, displaying cast, ratings, trailers, and related titles.
- Worked collaboratively with a teammate using Git branching, pull requests, and code reviews — gaining real-world team workflow experience.

Obel — React, Node.js, Express, MongoDB, Tailwind CSS [GitHub ↗](#) [Live ↗](#)

- Designed and built a personal productivity application that unifies task management and note-taking in a single, cohesive workspace — inspired by Obsidian.
- Architected the backend with a RESTful API and MongoDB for flexible, schema-driven content storage.
